

## Direct-acting 2/2 way plunger valve

- Direct-acting and compact valve up to diameter of DN6.0
- Vibration-proof, bolted coil system
- Increased leak-tightness with welded plunger guiding tube
- Explosion proof versions
- Energy-saving pulse versions

DTS 1000011032 EN Version: S Status: RL (released) | freigegeben | valide | printed: 02.02.2016

Type 6013 can be combined with...

 Type 2508  
Cable plug

 Type 2511  
ASI Cable plug

Valve 6013 is a direct-acting plunger valve. The stopper and plunger guiding tube are welded together to enhance pressure resistance and leak-tightness. Various seal material combinations are available depending on the application. A Bürkert-specific flange design (SFB) enables space-saving arrangement of valves on a manifold. The coils are moulded with polyamide or with chemically resistant epoxy. Pulse coils and 'Kick and Drop' electronics are available for overexcitation (plug 2511) for the reduction of electrical power consumption during operation. Optional manual actuation enables quick commissioning and easy maintenance. In combination with a plug in accordance with DIN EN 17301-803 Form A, the valves satisfy protection class IP65. Stainless steel valves satisfy NEMA 4X.

### Circuit Function A

2/2 way valve,  
normally closed by  
spring force

### Circuit Function B

2/2 way valve,  
normally open by  
spring force

Technical data

3.0		0.23	0-6	7	209 271	209 277	

<sup>1)</sup> Measured at +20 °C, 1 bar<sup>2)</sup> pressure at valve inlet and free outlet.

<sup>2)</sup> Measured as overpressure to the atmospheric pressure

**Please note** that the cable plug must be ordered separately, see accessories on page 8 and separate datasheet, Type 2508.

### Control for impulse version with polarity reversal control

Polarity is marked on the coil with a label	Features	Terminal connections
- switch ON +	valve open	(+) on terminal 2 and (-) on terminal 1 (see below)
+ switch OFF -	valve closed	(+) on terminal 1 and (-) on terminal 2 (see below)

**Note:** Please use only the cable plug without electrical circuitry for the impulse version

## Technical data - analytical version

<b>Analysis version</b>	Media flowing through are not contaminated
<b>Limit for residual carbon</b>	<0.2 mg/dm <sup>2</sup>
<b>Permissible leakage rate for medium</b>	10 <sup>-4</sup> mbar l/sec <ul style="list-style-type: none"> <li>Neutral medium, which does not attack the body and seal materials</li> <li>Technical vacuum</li> </ul>
<b>Electr. connection</b>	Tag connector acc. to DIN EN 175301-803 Form A (previously DIN43650) for cable plug Type 2508 (see accessories)
<b>Mounting instructions</b>	No oils, fats or silicone used during the assembly

**Solenoid valves for higher Requirements**  
This version is particularly suitable for switching from extremely pure gaseous medium. All media-affected parts are submitted to additional purification processes, so that the media is not contaminated under any circumstances.

The tightness test takes place at the Helium leak detector from a min. of 10<sup>-4</sup> mbar l/sec.

## Manifold mounting

## Ordering chart for Manifolds

Accessory part	Quantity of valve places				Item no.
Single manifold	in aluminium				005 020
Multiple manifold	in aluminium	Hole spacing A [mm]	Total length B [mm]	Hole spacing C [mm]	
	2	57	65	–	005 023
	3	90	98	–	005 286
	4	123	131	–	005 287
	5	156	164	57	005 035
	6	189	197	57	005 038
	8	255	263	90	005 386
	10	321	329	90	005 764
Connector nipple	with O-Ring, to connect from manifold				005 040
Covering plate	with screws and O-ring for locking unoccupied valve positions				005 630

With manifold mounting, please comply with the permissible duty cycle (5W models with 100% continuous rating or 8W model with 60% duty cycle). The pressure port for the manifold is designated with P (R), and the outlet port with A (B). Only connect together ports with the same designation.

2/2 way valves of Type 6013 can be operated together on a manifold with 3/2 way valves of Type 6014, circuit function C (not D or TI) if the operating pressures agree according to the rating plates. The manifolds can also be expanded if the valve functions are taken into consideration. Connector nipples with O-rings are used to connect the P (R) ports.

**Attention!**

Unused, open valve ports must be closed off with covering plates (see accessories). Manifold should be fixed on to a rail.

## Ordering chart for accessories

### Cable plug Type 2508 acc. to DIN EN 175301-803 Form A (previously DIN 43650)

Included in delivery is a cable plug with flat seal and fixing screw. Other versions, see Datasheet: Type 2508.

Circuit	Voltage	Item no.
without circuitry	0 -250 V	008 376
with LED	12 -24 V	008 360
with LED and varistor	12 -24 V	008 367
with LED and varistor	200 -240 V	008 369
with inverter <sup>1)</sup>	24V DC	on request
further versions	see datasheet Type 2508	

<sup>1)</sup> The inverter plug contains an electronic, which especially enables the electric 3 wire control  
 Input for 3 wire technology, common "-" polarity, two split "+" polarity.  
 Output suitable for impulse version for Type 6013/6014
